

GREENLOG INTERMODAL LOGISTICS SERVICES

ABOUT US

We are a logistics service provider specializing in **intermodal** and **multimodal** transport solutions. Established by professionals experienced in logistics and intermodal transportation, we have built a loyal client base, achieved steady growth, and expanded our services to deliver **sustainable logistics solutions** across Europe.

Our mission is to provide tailor-made, sustainable logistics services by utilizing 45' HCPW containers-swap bodies and connecting Europe with Türkiye through efficient intermodal corridors.

Dedicated to creating strategic advantages within the supply chain, we continue to grow through both organic development and strategic partnerships, supported by a **well-structured agency network**. Today, our extensive network of partners across Europe — specializing in **road, short-sea, and multimodal transport** — enables us to offer a comprehensive range of transport and integrated **logistics solutions**.

SUSTAINABLE LOGISTICS

We take our responsibilities seriously, striving to ensure that our actions **create a positive impact** on our clients, employees, and the environment. We uphold ethical business practices, implement sustainable logistics solutions, and embrace social responsibility across all aspects of our operations.

Our commitment to minimizing our environmental footprint and **advancing sustainability in the logistics sector** is unwavering. By cultivating a culture of accountability, we make sure every decision and action reflects our core values—driving long-term success and contributing to **a better future** for all stakeholders.
